

Parent governor Helen Warren has a background in physics and computer software. She gained a doctorate in astrophysics before spending some years as an academic at Oxford and Sussex universities. She now builds bespoke software for large charity sector and NGO clients as part of a successful company in the Cotswolds. Prior to joining the Cotswold School governing body in February 2015, she had been a primary school governor for 6 years with particular interest in monitoring school assessment and teaching practices and, in her role as chair of that governing body, providing strategic direction for the school and co-ordinating the work of the governing body. Helen has one child at school and a younger son of primary age.
